

HILDA DEMIRJIAN

HILDA DEMIRJIAN'S BIOGRAPHY:

Hilda Demirjian is an internationally known laser and skin care specialist. Her skill and advanced knowledge of the industry has transformed many faces and bodies around the world.

Hilda's love of skin developed in her native country, Persia, where skin wellness is considered *highly valuable*. As a young girl, she believed Persia to be the "Mecca" of skin care. As an adult, her love for beautiful skin grew into a driving passion. Hilda has traveled to many countries, learned from specialists, and taught students in such places like Canada, Mexico, the Middle East, Europe (Italy, UK, and France), the Far East (Japan), and the United States of America.

Unlike most skin care businesses, she uses a unique laser technology which provides nearly painless treatments for laser hair removal, collagen and skin rejuvenation. This allows Hilda to work with many types of skin without limiting her clientele. This applies to people with: rosacea, acne, sun damage, scars, stretch marks, and many more conditions.

From her more than 20 years of clinical experience, Hilda has been invited to appear on multiple television and radio shows and conference panels for her work in skin care. She is currently co-researching a study on the *correlation of skin and fertility with the help of laser therapy*. Hilda has formulated her own botanically-derived and cruelty-free skin care product line through years of scientific research with fruit stem cells. Her flagship product, the *Collagen-Elastin Gel with Apple Stem Cells*, will be expected to be the latest rave in town.

Hilda serves as an advisor to medical doctors and other laser specialists on skin care, training them on optimum laser utilization. She also acts as a consultant to various esthetic laser manufacturers.

Hilda Demirjian travels the globe searching to advance her laser and skin care business with new technology and other methodical practices with laser. She currently owns and manages two of the most successful laser and skin care centers, in the New York Metropolitan area.

Furthermore, she devotes time and support to various charitable organizations like the American Cancer Society, March of Dimes, THON, HADASSAH, YMCA, and the Ekal Vidyalaya Foundation.
